UNLESS OTHERWISE SPECIFIED ALL LEGIONELLA SAMPLES ARE RUN ISO 11731. ISO 11731=identification and enumeration of Legionella.

Additionally confirmation/speciation of the serogroup/Legionella species ID will only be run if requested. This is not required or certified under NYS ELAP. Covered facilities are defined in the NYS Protection against Legionella Regulations 2016 (page 24-25) As defined in Article 28 of the Public Health Law.

Sample Retention Times: Finished products are kept until code date unless otherwise advised. Environmental sponges, water, and any other samples that have a 'hold time' will not be saved after testing is complete, unless otherwise instructed by the regulatory body. Any atypical results: the client is contacted ASAP and CNA retains the sample based on the direction given by the client on how to proceed.

Legionella samples have a hold time of 48 hours. Samples need to be received by the day after collection. It is recommended samples are received at 5±3°C. If there is no biocide information provided, (when applicable) it will be noted on the report. If samples are received out of hold there will be a qualifier on the report.Legionella samples are received Monday-Friday only, unless prior arrangement with CNA. ***If dropping off on a Friday, the sample(s) must be submitted to CNA by 12pm.***
